

# REGULATORYAFFAIRS

STAR PROGRAMME

How to start your career in regulatory affairs

#### **Benedikt Van Nieuwenhove**

Managing Director

Regulatory Affairs is a crucial area to ensure that pharmaceutical products can be manufactured, authorised and maintained on the market, as well as guarantee that they are aligned with all applicable regulations and legislation.

This is a fascinating field with numerous career opportunities. With our STAR Programme you will get acquainted with the job positions available and will understand the different players involved in regulatory affairs.

If you are looking for a way to enter in this area with the knowledge and experience required to start your career, then this Programme is for you!

Become a regulatory affairs professional now!

## BECOME A REGULATORY AFFAIRS PROFESSIONAL

## STAR PROGRAMME

### **ABOUT**

This STAR Programme is a must for anyone wanting to start a career in regulatory affairs as it will grant you the knowledge, skills, competencies and expertise required to become a regulatory affairs professional.

This Programme consists of 2 parts:

- 1.Theoretical part
- 2.Practical part

- **1.Theoretical part:** A full-week training covering the different areas and activities within regulatory affairs and associated regulations and guidelines.
- **2.Practical part:** 6-months internship to provide you with the experience most employers are looking for in this area. The internships are customised upon your needs, expectations and location.

#### THEORETICAL PART

### PROGRAMME AGENDA

## PRACTICAL PART INTERNSHIPS

The internships will take place to help you have a complete overview of the actual duties and number of areas within regulatory affairs, as well as to help you know which environment to pursue your career in the future:

**PHARMA COMPANY** 

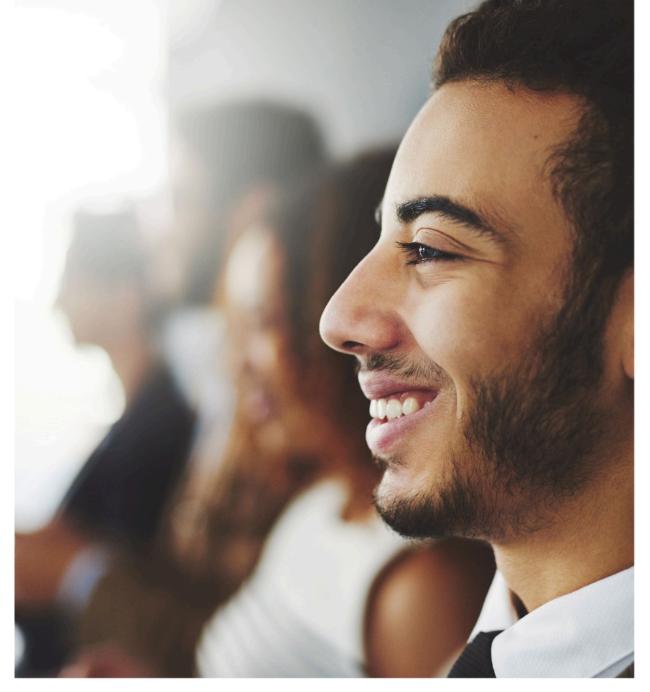

6 months in

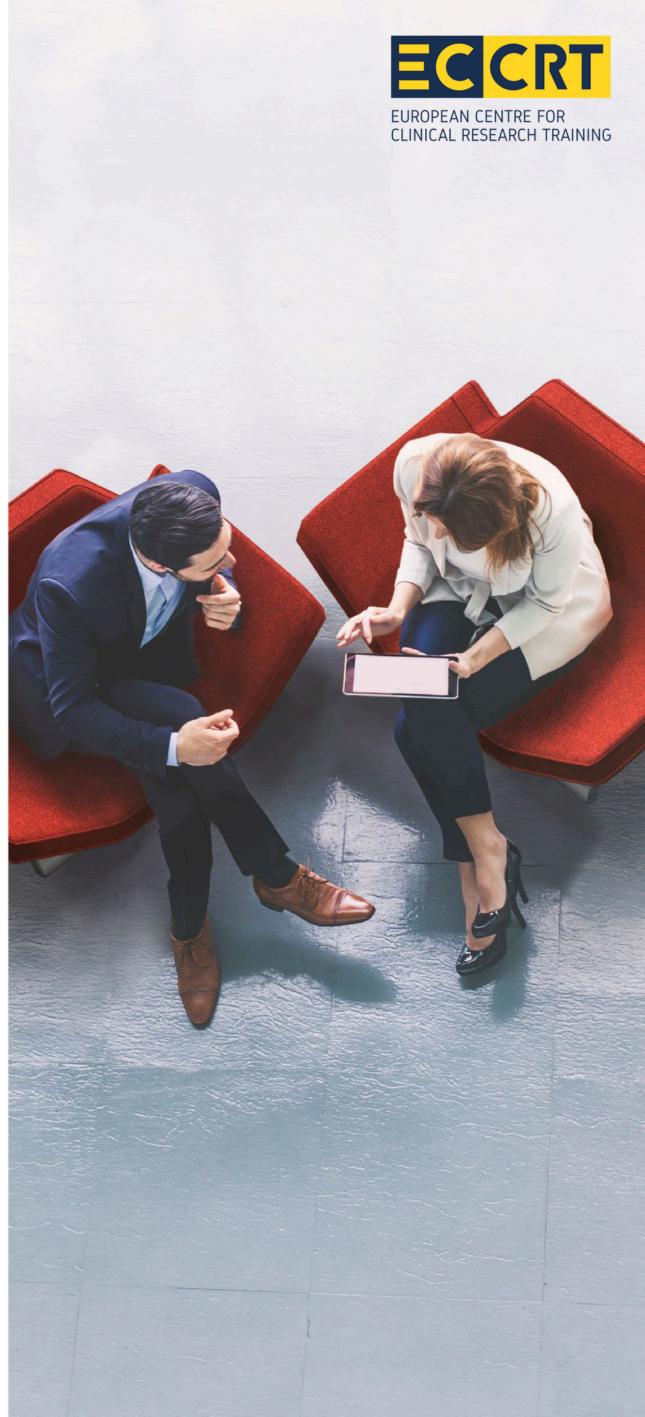

OR

**CONSULTANCY COMPANY** 

These internships will help you to acquire knowledge and hands-on experience in regulatory affairs regulations, processes and related activities.

## TESTIMONIALS

Michela Lisjak Regulatory Affairs Trainee

The ECCRT Regulatory Affairs programme was a great experience in my career transition from academia to the pharmaceutical industry. The course content is designed for individuals from diverse backgrounds, with no prior regulatory experience required, and offers personalized guidance to help secure an internship that matches with personal skills and background. In addition, the programme offers networking opportunities with industry professionals and peers, helping build a professional network that is crucial for career advancement.

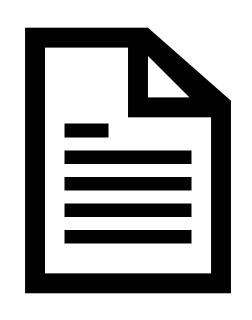

**Mopelola Adegun**Regulatory Affairs Specialist

It has been really interesting right from the first day of our meeting face to face in Belgium Being in a room with trainees from diverse scientific backgrounds and experienced Regulatory Affairs expert in the field enhanced productive and interesting conversation. Not a boring moment!

Learning is not enough to have knowledge, ability to practice is key, the RA STAR Programme gave me the opportunity to have much needed practical exposure to the industry. I was able to do my internship in Janssen Pharmaceuticals, a top global pharmaceutical company. I also I would like to appreciate Virginie Hamtiaux for her kind support and follow-up all through the programme. I would really recommend RA STAR Programme to everyone interested in building a career in Regulatory Affairs!

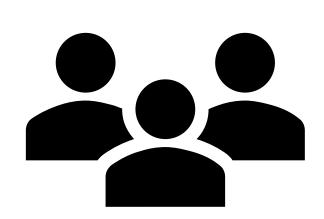

## HOW TO PARTICIPATE? APPLICATION PROCESS

### **APPLICATION**

Fill out the <u>application form</u> & submit (this does not mean you are registered for the Programme and will have to pay the Programme's fee).

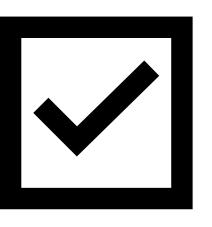

#### **REVIEW**

Your application form (including CV and motivation letter)
will be reviewed by ECCRT and your Mentor.

#### **INTAKE CALL**

An intake conversation with your Mentor will be organised shortly after the submission of your application.

#### **REGISTERED**

After the intake call, if accepted, you can proceed with your registration by booking the STAR Programme session you want to attend.
