

Are remote trials the future?

Decentralised Patient-Centric Trials: From Theory to Practice

This programme will be a learning journey, where the attendees will not only learn from the expert trainers, but where the aim will be that the entire group forms a community of practice and grows together.

Online | Brussels

Starting 18 March 2021

Multiple sessions

Trainers

Bodo Lutz

Programme Agenda

This journey is divided in 3 parts. You have the choice to book for the entire programme or only for the online events.*

PART 1

Introduction

7 themes, 2 webinars for each theme

- Introducing concepts
- Bringing cases
- Assigning home/ group work

PART 2

Making it work

1-day face-to-face workshop in Brussels

- Presenting home/ group work
- Sharing experiences
- Tackle challenges
- Building consensus

PART 3

Sustain it

6 webinars following the workshop

- Creating a community
- Continuous sharing of experiences
- Making it sustainable
- Onboarding of new talent

**The above content is only a start: the actual content will be dynamic and driven by the Community*

Why should you attend?

- Flexibility to bring your challenges to the agenda
- Community of practice
- All stakeholders involved
- Case-based (bringing theory into practice)
- Sharing of experiences
- Vast number of experts
- Interactivity

Who should attend?

- » Clinical Trial Management
- » Clinical Innovation Teams
- » Regulators, Health agencies driving innovation
- » Investigational Sites and Patient Service Centers
