Clinical Development Excellence

Journey to Excellence

Reducing your clinical
research development risks

Developing your team with
the right mentors

What do we aim for?

ECCRT proposes a new generation of training modality to support organisations in their clinical development. To do so, a mentoring programme consisting of a technical training followed by on-the-job mentoring by experts is provided.

How we can help you reach Excellence

Step 1 : Gap Analysis

It all starts with a complete and thorough analysis of your clinical research process. This will allow us to deliver a detailed report with a related action plan enabling you to figure out how your teams could reach Excellence.

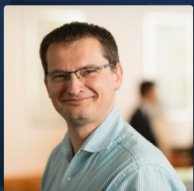

Step 2 : Training

This step includes formal training of your staff to excel in your clinical development with the support of top-tier qualified trainers in the domain.

Step 3 : Mentoring

The mentor will guide your organisation throughout a “learning-on-the-job” journey by providing technical support to your teams within an agreed framework.

Lead Mentors

Prof. Dr. Benedikt
Van Nieuwenhove

ECCRT has set up a strong international network of mentors, all experts in their respective area within clinical research.

Dr. Vincent
Baeyens

We trained more than 16,000 professionals in the industry to excel in their roles.
